

TUESDAY, AUGUST 28, 2018

13:00 - 14:00 ROOM: CENTRE STAGE - THE HUB

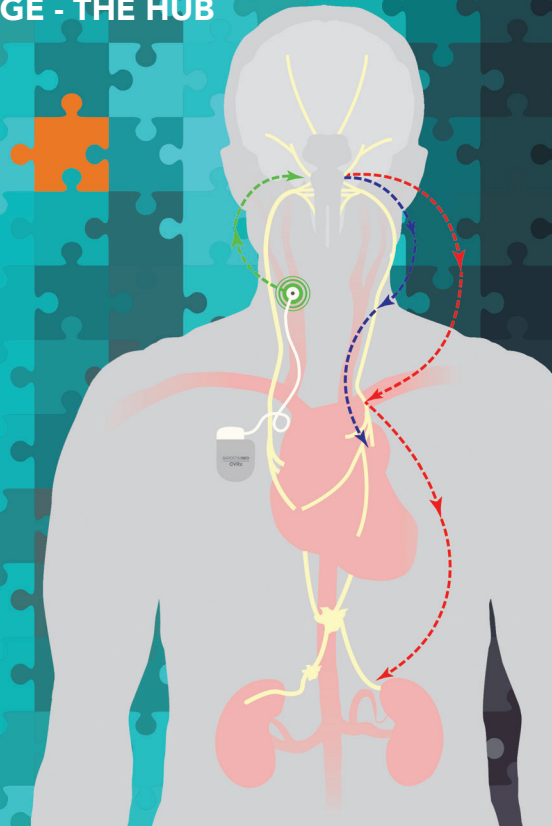

Baroreflex activation therapy for resistant hypertension and heart failure: the new piece in the puzzle

CHAIRS

Stefan D. Anker, Berlin, Germany
Marco Metra, Brescia, Italy

SPEAKERS

Gerasimos S. Filippatos, Athens, Greece
Andrew Coats, Warwick, UK
Atul Pathak, Toulouse, France
Johann Bauersachs, Hannover, Germany

SATELLITE SYMPOSIUM

Organised by Charité Friends
& Sponsors Trust

CVRx®

TUESDAY, AUGUST 28, 2018

13:00 - 14:00 ROOM: CENTRE STAGE - THE HUB

Baroreflex activation therapy for resistant hypertension and heart failure: the new piece in the puzzle

Welcome and introduction – is a piece missing from the puzzle?

Gerasimos S. Filippatos, Athens, Greece

Understanding the puzzle: baroreflex – direct targeting
of relevant pathophysiologic mechanisms

Andrew J. S. Coats, Warwick, UK

Stimulating the baroreflex – completing the resistant hypertension
puzzle

Atul Pathak, Toulouse, France

Baroreflex activation therapy – another piece of the puzzle
for heart failure with reduced ejection fraction

Johann Bauersachs, Hannover, Germany

Panel discussion

EDUCATIONAL OBJECTIVES

- Assess the baroreflex as a primary regulator of cardiovascular function and have a better understanding of the rationale for carotid baroreceptor stimulation
- Understand how specific management strategies can be applied in special populations of patients with resistant hypertension when drugs have failed
- Review the data and experience with baroreflex activation therapy in heart failure with reduced ejection fraction
